

MIDNIGHT SUN FEDERAL CONSTRUCTION, LLC (Midnight Sun) is an 8(a)-certified construction contractor specializing in design-build and bid-build construction, including alterations, repairs, renovations, and new construction. Our team excels in delivering complex projects in highly secure, occupied facilities with proven success.

Midnight Sun offers:

- Bonding of \$25 Million single project; \$50 Million aggregate through Zurich
- Resources in Washington DC-Maryland-Virginia; North Carolina; Florida; Louisiana; Texas; and the Northwest
- Access to a comprehensive, nationwide network of highly qualified subcontractors, architects, and engineers
- SBA-Approved Mentor Protégé Agreement with a recognized, national construction leader
- Uncompromising commitment to safety

ADVANTAGE. As a wholly-owned subsidiary of Kikiktagruk Inupiat Corporation, an Alaska Native Village Corporation, Midnight Sun can leverage the financial support, accounting, and management systems of corporate umbrella experience and resources achieved through 50 years of successful performance. Additionally, the firm may receive direct awards from Civilian agencies up to \$25 Million, and Department of Defense Agencies up to \$100 Million without justification which cannot be protested.

Design-Build Construction

Midnight Sun can provide integrated Design-Build services that combine design and construction under one contract, streamlining communication, accelerating timelines, and improving cost efficiency. Our collaborative approach ensures high-quality results that meet federal standards, project goals, and budget requirements.

Bid-Build Construction

Midnight Sun can deliver high-quality Bid-Build construction services. Our team excels at interpreting plans, managing subcontractors, and maintaining strict adherence to specifications, timelines, and budgets. We ensure full compliance with all applicable codes, safety standards, and contract requirements.

Specialized Construction

Midnight Sun has collective experience delivering complex construction projects in high-security, industrial, and laboratory environments. Our team is skilled in managing strict access controls, specialized systems (e.g., HVAC, clean rooms, containment), and mission-critical infrastructure. We ensure full compliance with federal security protocols, safety standards, and technical specifications unique to sensitive facilities.
